

# Facilities Management Solutions

## Faster, Easier Acquisitions

### Acquisition Offerings Built on Facility Management Expertise

Facilities management, in the federal government, is a specialized field combining guidelines for operating civilian and military facilities with industry best practices. GSA contracts are designed by and for facilities management experts. The various technical specialties include:

- Technologies (HVAC, building management systems, fire-suppression systems, elevators, access control);
- Maintenance (grounds, equipment, janitorial, plumbing);
- Planning and compliance concerns (ADA, fire suppression, safety, emergency preparedness, environmental and energy management); and
- Workspace maximization (ergonomics, furniture and furnishings, interior design, space planning).

GSA Multiple Award Schedule (MAS) contracts provide you with a readily accessible compilation of pre-qualified contractors and products—which means your acquisitions are easier and faster than open-market procurements.

GSA MAS contracts can provide the relevant, timely and extensive commercial services needed to meet routine requirements, best practices, compliance standards and new initiatives. Using the GSA MAS program to its fullest capability eliminates contracting steps and frees your agency's contracting expertise for the truly one-of-a-kind requirements. Additionally, it builds an economy-of-scale benefiting all federal purchasers.

GSA can be your first source for building and facility maintenance acquisitions.

## Services and Products Available from GSA

Listed below are seven groupings of facilities management services and products, to help you determine the products and/or services that meet your needs. The table inside cross references each group to GSA MAS Special Item Numbers (SIN) and programs that include offerings in that group.

### Complete Maintenance and Management Packages

These services cover the complete operations, maintenance and repair of military and government facilities. Through the SINs in this area, multiple services can be acquired for extended periods and may also include the contracting of the management and scheduling of routine services. You may choose one service or a combination of the services offered. These include the operational and maintenance needs of most facilities, such as janitorial services, landscaping and snow removal, pest control, painting and repair, fire suppression system maintenance, electrical, HVAC, refrigeration, cooling, elevator maintenance—to name just a few. At GSA, we offer you options that allow these services to be acquired easily as a “package” and for extended periods.

### Energy Management

To help your agency operate in compliance with federal initiatives and in an environmentally sustainable manner, the energy-management area includes expert and support services in all areas of energy strategy, planning, training and implementation. Energy management covers requirements of all sizes, from a single training class to enterprise-wide change. One service includes a four-phased, complete energy-management solution that starts with auditing, and incorporates requirements analysis, implementation and then measurement. The support services offered to you include billing, preparing SOWs, and management oversight.

The energy-management area also includes major modernization projects, building commissioning services, installation of metering equipment and software, audits and analysis of energy and water usage, recommendations on infrastructure upgrades and complete support—including consulting, training and other services on energy-efficient building certifications, such as Leadership in Energy and Environmental Design (LEED®). This area extends to include water conservation, carbon management solutions, and new developments and innovative approaches to renewable or sustainable energy.

To offer you the latest in this rapidly advancing field, we add services as they are introduced into the commercial marketplace. Rest assured, the newest state-of-the-industry services and technology are available to you from the GSA MAS program.

### Systems Maintenance and Inspection

At GSA, we offer you a comprehensive array of individual building maintenance and inspection services. The systems maintenance and inspection area allows the maintenance and repair of electrical systems, escalators, elevators, fires alarms and suppression systems, and refrigeration and HVAC systems—all with the convenience of using pre-qualified contractors and labor rate ceilings.

### Operations, Maintenance, Logistic and Support Services

This area covers many of the activities often necessary for facilities management, such as asset management, materials-acquisition management, shipping, storing and receiving materials, and material-handling equipment and systems. GSA offers your agency

a vast array of solutions to provide and support these operations worldwide. At the most comprehensive level, entire warehouse and logistic functions can be obtained from third-party commercial providers, along with the support services needed to maintain those operations. Similar services can also be acquired separately and on a smaller scale. The GSA MAS program features contractors who are experienced with military and civilian logistical requirements. These contractors can provide you with consultation, planning services, scheduling, and task estimates, and they also prepare requirements, operate stockrooms to multiple storage facilities, and perform depot-level maintenance, as well as many more services.

### Furniture and Furnishings

GSA provides furniture, furnishings and related services for facilities such as offices, dormitories, industrial workspaces, healthcare facilities, and educational settings. These products are a wide range of items, including floor coverings, hazardous-material storage, electronic equipment cabinets, industrial workbenches, tables, storage systems, correctional-institution furniture, hospital furniture, and furniture for childcare centers. At GSA, we have America's leading furnishing suppliers on contract and available to deliver a solution that fits nearly any environment and budget. Your options even include environmentally friendly flooring and GREENGUARD®-certified furniture, which is made from low-emitting materials. GSA also offers a complete solution for large furniture purchases.

### Facility Security

All federal and military facilities face an array of regulations standardizing access control and requiring physical-security measures. GSA MAS has contractors available who are experts at developing the business processes and practices needed to maintain regulatory compliance. GSA also has a full spectrum of physical security measures, ranging from guard services to physical vehicle barriers and backup power supplies. Additionally, complete solutions for planning, installing and maintaining fire, security, alarm and access control systems are available from GSA. Maintaining the most up-to-date and needed technologies includes an effort to present physical- and cyber-security offerings in a unified way. To learn more, visit [www.gsa.gov/securitysolutions](http://www.gsa.gov/securitysolutions).

### Equipment, Products and Supplies

This area includes almost everything available in the commercial marketplace, with added benefit of compliance peace-of-mind. Whenever you choose GSA, you have greater assurance that you are following acquisition regulations, trade agreements, socioeconomic guidance (like the Javitz-Wagner O'Day Act) and laws about products' environmental attributes. Items requisitioned through GSA Global Supply™ even include delivery to overseas military locations, through the Defense Transportation system. Whenever interested in a particular product, you may perform a search on [www.gsaadvantage.gov](http://www.gsaadvantage.gov); this will enable you to view results providing a wide selection of products available from GSA contractors and GSA Global Supply™, all at competitive prices.

For more information about facilities solutions from GSA, please visit [www.gsa.gov/facilitiesolutions](http://www.gsa.gov/facilitiesolutions) or call 703-605-9494 or e-mail [facilitiesolutions@gsa.gov](mailto:facilitiesolutions@gsa.gov).

# Facility Management Community Crosswalk

The following Facility Management Community Crosswalk chart simplifies identifying GSA MAS contracts to meet your specific needs. This crosswalk is designed to help translate your requirements to GSA contracts that can meet those requirements.

The Facility Management Areas in the chart simulate store aisles, organizing related offerings for intuitive shopping. Working through the SIN Titles, you can determine which SIN or SINs best meet your needs, and can target those SINs in your Request for Quote. By identifying all the SINs relevant to a Facility Management Area, resourcing requirements can be an easier job. The Facility Management Community Crosswalk is a one-source reference of the contracts and acquisition methods available for product or service areas.

## How to Use This Chart (Questions? Call (703) 605-9494 or e-mail [facultysolutions@gsa.gov](mailto:facultysolutions@gsa.gov)):

1. Select a Facility Management Area.
  - 2. Scan down the Facility Management Areas, reading the SIN Titles. When using a PDF version of this document (available at [www.gsa.gov/facultysolutions](http://www.gsa.gov/facultysolutions)), the SIN Title is hyperlinked to [www.gsaelibrary.gsa.gov](http://www.gsaelibrary.gsa.gov) for details and contractor listings.
  - 3. Working through the SIN Titles, take note which indicate the SINs available to meet each requirement.

## Obtaining Facility Management Services and Products: GSA Gives You Options

### Services

#### Flexible and Scalable Procurement

Government agencies are located worldwide, and they range in size, function and buying preferences. Our goal is to help your agency identify the best acquisition tools for your needs.

#### Direct Access to Pre-Approved Contractors Online

GSA's eLibrary serves as the most comprehensive online information resource for Multiple Award Schedules and technology contracts. It allows users to search contracts by contractor name, contract number, Special Item Number (SIN), GSA MAS number, geographic location, keywords and to filter contractors by socioeconomic status. To learn more, visit [www.gsaelibrary.gsa.gov](http://www.gsaelibrary.gsa.gov).

#### Time-Saving Ordering Tools

eBuy is an on-line Request for Quote tool that enables you to acquire contractor quotes for your requirements that may range from small to large and complex. eBuy simplifies your solicitation process by providing a streamlined tool for you to: post solicitations, receive quotes from contractors; find sources of supply; submit responses to contractor questions; and establish and use Blanket Purchase Agreements. To learn more, visit [www.ebuy.gsa.gov](http://www.ebuy.gsa.gov).

#### Complete Solutions

When your requirements cross multiple disciplines or combine services and products, the strength and diversity of the GSA MAS contractor community can rise to the challenge. For your more complex requirements, many contractors can provide total solutions across numerous Schedules. Additionally, Contractor Team Arrangements (CTAs) allow MAS contractors to create their own partnerships and to provide comprehensive solutions beyond the scope of their individual contracts. Another feature of several Schedules is the inclusion of a Special Item Number (SIN) for repair-and-alterations and the ancillary services. Each of these SINs allows ancillary work be included as part of a primary task order, eliminating the need for another task order for related work. To learn more, visit [www.gsa.gov/schedules](http://www.gsa.gov/schedules).

#### GSA Assisted Services

GSA offers acquisition, project and financial management for many facilities management products and services, on a short- or long-term basis. We combine acquisition, project management and financial resources to deliver customized, scalable solutions throughout the project's life cycle, on a fee for service basis. Working through Interagency Agreements (IAs), GSA establishes the service level expectation with your agency's program, financial, contracting and legal staff to ensure requirements are met on time, within budget. To learn more, visit [www.gsa.gov/aas](http://www.gsa.gov/aas).

### Products

#### Procuring Equipment, Construction Materials, Tools, Products and Supplies

#### GSA MAS: Order from a Comprehensive Selection of Products, from Pre-Qualified Contractors

GSA Advantage!® is the federal government's premier online ordering system that provides 24-hour access to over 17 million products and services solutions available from over 16,000 GSA Multiple Award Schedules contractors, as well as all products available from GSA Global Supply™. GSA Advantage!® offers FAR compliant purchasing; direct contact with schedule contractors; specified grouping of products and services; easy-to-use research capabilities to narrow results and compare features, prices, and delivery options; icons for identifying special attributes of products such as environmental characteristics, preferred sources, or eligibility for state and local programs. GSA Advantage!® increases the speed and efficiency of procurements with a streamlined online shopping and ordering experience. For those state and local government entities looking to simplify their procurement process, GSA Advantage!® offers them the ability to use their own state or local government-issued charge card to access a wide variety of products and services solutions. It also provides customers with multiple payment options and online viewing of order status to ensure order management from beginning to end. To learn more, visit [www.gsaadvantage.gov](http://www.gsaadvantage.gov).

#### GSA Global Supply™: Just a Requisition Away

From office supplies to disaster relief products, GSA Global Supply™ provides fast, easy access to tens of thousands of established-source products for federal government agencies at the federal, state, and local levels. Depending on a customer's needs, Global Supply can facilitate any requisition-based orders (with no need for comparison shopping) through worldwide delivery, 24/7 support, AbilityOne (formerly known as JWOD) guaranteed products, payment using GSA SmartPay® or AAC/DoDAAC, government-to-government transactions, and unrestricted spending limits. It also ensures that all orders comply with the Federal Acquisition Regulations and other DoD, socioeconomic, and environmental policies with which customers need to be concerned. To learn more, visit [www.GSAglobalsupply.gsa.gov](http://www.GSAglobalsupply.gsa.gov).

#### GSAXcess®: Reuse is Recycling

Screening other agencies' excess personal property inventories is the federal government's priority source of supply and with today's increased environmental consciousness, reusing excess property is a source of pride. To help you acquire the excess property your agency needs, GSA offers [www.gsa.gov/gsaxcess](http://www.gsa.gov/gsaxcess), the personal property tool for the federal government. At GSAXcess™, reporting, searching and selecting excess property is convenient and user-friendly.
